Section A

Vol. 87, January–December 1978

SUBJECT INDEX (Chemical Sciences)

Acetoacetanilide
Iron(III) complexes of α,β-unsaturated β-ketoamines 455

Acetoaceto-*p*-toluidide
Iron(III) complexes of α,β-unsaturated β-ketoamines 455

Adsorption
Tracer studies of adsorption of Sr^{++} on copper 55

Adsorption
Sorption properties of oxides I: Hydrous thorium oxide 409

Affinity chromatography
Chemical approaches to penicillin allergy-IV 145

Affinity chromatology
Chemical approaches of penicillin allergy-III 1

Alkali halide
Conductance studies on the interaction of urea with ions in formamide 121

Alkyltin (IV) species
Studies on alkoxy complexes of alkyltin (IV) in non-aqueous solvents 61

Allyl alcohol
Polarographic study of the kinetics of oxidation of allyl alcohol by chloramine-T 215

Alkoxy complexes
Studies on alkoxy complexes of alkyltin (IV) in non-aqueous solvents 61

Alkyl naphthols
Reactions of tetrahalogeno-*o*-benzoquinones—Part VII. Reaction of alkyl-2-naphthols with tetrachloro-*o*-benzoquinone 181

Alpha-hydroxy acids
Kinetics of uncatalysed and catalysed oxidation reactions of α-hydroxy acids by periodate 87

Ambidentate coordination
Reactions of coordinated bivalent tetradentate Schiff-base chelates of nickel (II) and palladium (II) 363

3-amino-4-cyano-3-pyrrolins
Synthesis of some 2,4-diamino-pyrrolo-pyrimidines 229

4-amino-6,7-dihydropyrrolopyrimidine-3, oxide
Synthesis of some 2,4-diamino-pyrrolo-pyrimidines 229

Antigen-antibody interaction
Chemical approaches to penicillin allergy-V 165

Antigen-antibody reaction
Chemical approaches of penicillin allergy-III 1
Chemical approaches to penicillin allergy IV 145

Atoms and molecules
Orthonormality-constrained orbital optimisations in MC-SCF theory 37

Benzoylacetone
Iron (III) complexes of α, β-unsaturated β-ketoamines 455

Beta-diketones
Mixed chelates by solvent extraction-mixed chelates of indium with β-diketones in carbon tetrachloride and xylene media 203

Binary systems
Thermodynamic study of binary mixtures of isomeric butylamines with n-hexane: Enthalpy of hydrogen bonding 23

7-bromo-8-hydroxyquinoline-5-sulphonic acid
Formation constants of chelates of 7-bromo-8-hydroxy-quinoline-5-sulphonic acid with yttrium and some lanthanides 359

Butylamines-hexane
Thermodynamic study of binary mixtures of isomeric butylamines with n-hexane: Enthalpy of hydrogen bonding 23

Cadmium
Chronopotentiometric study of the dissociation rate constants of some nitrilotriacetic acid complexes 285

Catalysed oxidation
Kinetics of uncatalysed and catalysed oxidation reactions of α-hydroxy acids by periodate 87

Catalytic activity
Solid state properties of lithium doped nickel oxide and its catalytic activity towards dehydrogenation of isopropanol 133

Chelate linkage isomers
Reactions of co-ordinated bivalent tetradentate Schiff-base chelates of nickel (II) and palladium (II) 363

Chemical perturbation
Green's function application to chemical perturbation studies 353

Chloramine-T
Polarographic study of the kinetics of oxidation of allyl alcohol by chloramine-T 215
Chromatography
Chemical approaches to penicillin allergy-IV 145
Chromatographic separation of nitrite and nitrate ions 199
Paper chromatographic separation of Co(II) and Co(III) via their acetylacetonate complexes 461
Chronopotentiometry
Chronopotentiometric study of the dissociation rate constants of some nitrilotriacetic acid complexes 285
Cinnamylation
Synthetic studies in cinnamylated derivatives of resacetophenone and related compounds 189
Cinnamyloxy derivatives
The Claisen rearrangement of 7-cinnamyloxy derivatives of 3-methoxyflavone, 4-methylcoumarin and isoflavone 389
Citrylidene-*p*-methylacetophenone
Studies in terpenoids. Part 43 235
Claisen rearrangement
Synthetic studies in cinnamylated derivatives of resacetophenone and related compounds 189
Claisen rearrangement
The Claisen rearrangement of 7-cinnamyloxy derivatives of 3-methoxyflavone, 4-methylcoumarin and isoflavone 389
CMR
Structure of moreollin, a pigment isolated from *Gascinia morella* Desser 75
CNDO
Force field for planar vibrations of urea: Use of CNDO/Force MO calculations 337
Co(II) acetylacetonate
Paper chromatographic separation of Co(II) and Co (III) via their acetylacetonate complexes 461
Cobalt molybdate
Binding state of propylene in relation to partial oxidation reaction 405
Complex xanthone
Structure of moreollin, a pigment isolated from *Garcinia morella* Desser 75
Composite clay membranes
Thermo-osmosis of water through composite clay membranes—The parallel arrangement 435
Conformation
Chemical approaches to penicillin allergy IV 145
Chemical approaches to penicillin allergy-V 165
Copper
Chronopotentiometric study of the dissociation rate constants of some nitrilotriacetic acid complexes 285
Corrosion product
Sorption properties of oxides II—Sorption of certain corrosion product cations on hydrous zirconium oxide, thorium oxide and magnetite 415
Crystallography
Lattice imaging by high resolution electron microscopy: The role of high resolution electron microscopy in solid state chemistry 295
Cupric complexes
ESR study of mixed ligand complexes of copper with dialkyldiselenophosphate as one of the ligands 395
Cyanovinyl esters
Steric effects on the ultraviolet absorption of 1,2-enedioic and related systems 371
Dehydrogenation
Solid state properties of lithium doped nickel oxide and its catalytic activity towards dehydrogenation of isopropanol 133
Depsipeptides
The dimensions of the ester unit 13
Dienones
Reactions of tetrahalogeno-*o*-benzoquinones-Part VII. Reaction of alkyl-2-naphthols with tetrachloro-*o*-benzoquinone 181
2′ 4′-dihydroxychal cone
A convenient synthesis of lonchocarpin and isolonchocarpin 247
Dimension-ester unit
The dimensions of the ester unit 13
1,1-dimethyl propargylation
A convenient synthesis of lonchocarpin and isolonchocarpin 247
Dislocation
Lattice imaging by high resolution electron microscopy: The role of high resolution electron microscopy in solid state chemistry 295
Dissociation energy
Dissociation energy of CO^+ from the true potential energy curve 211
Diterpene
Studies in terpenoids. Part 43 235
DNA-protein interaction
Interactive computer graphics for bio-stereochemical modelling 95
Electrical properties
A study of Co_{3-x} Ni_x O_4 ($0 \leqslant x \leqslant 1$) system 115
Electrical resistivity
Electrical and magnetic properties of the system $LaNi_{1-x}Fe_xO_3$ 331

Electroneutrality
Electrical properties of the Fe_2O_3-V_2O_5 system 259

Electron microscopy
Lattice imaging by high resolution electron microscopy: The role of high resolution electron microscopy in solid state chemistry 295

Electron promotion
Some effects of ($2s$–$2p$) electron promotion in boron 141

Ene-anhydrides
Steric effects on the ultraviolet absorption of 1, 2-enedioic and related systems 371

Enedioates
Steric effects on the ultraviolet absorption of 1,2-enedioic and related systems 371

Enthalpy
Chemical approaches to penicillin allergy-V 165

Entropy
Chemical approaches to penicillin allergy-V 165

ESR
ESR study of mixed ligand complexes of copper with dialkyldiselenophosphate as one of the ligands 395

Ester unit
The dimensions of the ester unit 13

Force calculation
Force field for planar vibrations of urea: Use of CNDO/Force MO calculations 337

Force field, urea
Force field for planar vibrations of urea: Use of CNDO/Force MO calculations 337

Fluorescence quenching
Chemical approaches to penicillin allergy-IV 145

Formation constants
Formation constants of chelates of 7-bromo-8-hydroxy-quinoline-5-sulphonic acid with yttrium acid some lanthanides 359

Geranylacetone
Studies in terpenoids. Part 43 235

Gravimetry
2 hydroxy-1-acetonaphthoneoxime as analytical reagent: gravimetric determination of nickel and palladium 291

Green's function
Green's function application to chemical perturbation studies 353
Liquids and liquid mixtures—I 347

Hafnium
Solvent extraction of hafnium 465

Hapten
Chemical approaches of penicillin allergy—III 1

Hapten binding sites
Chemical approaches to pencillin allergy-IV 145

Heats of mixing
Thermodynamic study of binary mixtures of isomeric butylamines with *n*-hexane: Enthalpy of hydrogen bonding 23

Hybridization
Some effects of ($2s-2p$) electron promotion in boron 141

Hydraulic permeability data
Thermo-osmosis of water through composite clay membranes—The parallel arrangement 435

Hydrazinates
Preparation and characterization of hydrazinium derivatives 281

Hydrazinium derivatives
Preparation and characterization of hydrazinium derivatives 281

Hydrogen bonding
Thermodynamic study of binary mixtures of isomeric butylamines with *n*-hexane: Enthalpy of hydrogen bonding 23

Hydrothermal equilibria
Hydrothermal equilibria in Nd_2O_3-H_2O-CO_2 system 69

Hydrous thorium oxide
Sorption properties of oxides I: Hydrous thorium oxide 409

2-hydroxy-1-acetonapthoneoxime
2-hydroxy-1-acetonaphthoneoxime as analytical reagent: Gravimetric determination of nickel and palladium 291

7-hydroxyflavanone
A convenient synthesis of lonchocarpin and iso-onchocarpin 247

Immunology
Chemical approaches of penicillin allergy—III 1

Indium chelates
Mixed chelates by solvent extraction—mixed chelates of indium with β-diketones in carbon tetrachloride and xylene media 203

Infrared spectrum
Infrared spectra of $(NH_4)_2BeF_4$ 45

Integrodifferential equation
Liquids and liquid mixtures—I 347

Interactive graphics
Interactive computer graphics for bio-stereochemical modelling 95

Interstitial state
Electrical properties of the Fe_2O_3-V_2O_5 system 259

Iodate-hydrogen peroxide system
The iodate-hydrogen peroxide system: An oscillatory chemical reaction 253

Iron (III) complexes
Iron(III) complexes of α, β-unsaturated β-ketoamines 455

Isoflavone
The Claisen rearrangement of 7-cinnamyloxy derivatives of 3-methoxylflavone, 4-methylcoumarin and isoflavone 389

Isopropanol on NiO
Solid state properties of lithium doped nickel oxide and its catalytic activity towards dehydrogenation of isopropanol 133

Iterational method
Liquids and liquid mixtures—I 347

Ketoamine complexes
Iron(III) complexes of α, β-unsaturated β-ketoamines 455

Kinetic isotope effect
Kinetics and mechanism of oxidation of aromatic secondary alcohols by Tl (III) acetate 219

Kinetics
Polarographic study of the kinetics of oxidation of allyl alcohol by chloramine-T 215

Kinetic study
Chemical approaches to penicillin allergy-IV 145

Lanthanum ferrite
Electrical and magnetic properties of the system $LaNi_{1-x}Fe_xO_3$ 331

Lanthanum nickelate
Electrical and magnetic properties of the system $LaNi_{1-x}Fe_xO_3$ 331

Lattice imaging
Lattice imaging by high resolution electron microscopy: The role of high resolution electron microscopy in solid state chemistry 295

Lead
Chronopotentiometric study of the dissociation rate constants of some nitrilotriacetic acid complexes 285

Ligand hyperfine
ESR study of mixed ligand complexes of copper with dialkyldiselenophosphate as one of the ligands 395

Lippincott potential function
Dissociation energy of CO^+ from the true potential energy curve 211

Ln_2MoO_6 oxides
Preparation and structure of some Ln_2MoO_6 oxides 267

Manganous zinc ferrites
Preparation of manganous zinc ferrites 49

Mass spectra
Structure of moreollin, a pigment isolated from *Garcinia morella* Desser 75

MC-SCF method
Orthonormality-constrained orbital optimisations in MC-SCF theory 37

Mechanism
Kinetics and mechanism of oxidation of aromatic secondary alcohols by Tl(III) acetate 219

3-Methoxyflavone
The Claisen rearrangement of 7-cinnamyloxy derivatives of 3-methoxyflavone, 4-methylcoumarin and isoflavone 389

4-Methylcoumarin
The Claisen rearrangement of 7-cinnamyloxy derivatives of 3-methoxyflavone, 4-methylcoumarin and isoflavone 389

Mixed ligand complex
ESR study of mixed ligand complexes of copper with dialkyldiselenophosphate as one of the ligands 395

Molecular constants
Vibrational analysis of the isotopic methylammonium ions 429

Molecular display
Interactive computer graphics for bio-stereochemical modelling 95

Molecular modelling
Interactive computer graphics for bio-stereochemical modelling 95

Molybdate catalyst
Binding state of propylene in relation to partial oxidation reaction 405

Nickel
2-Hydroxy-1-acetonapthoneoxime as analytical reagent: Gravimetric determination of nickel and palladium 291

Nickel oxide-lithium doped
Solid state properties of lithium doped nickel oxide and its catalytic activity towards dehydrogenation of isopropanol 133

Nitrate analysis
Chromatographic separation of nitrite and nitrate ions 199

Nitrilotriacetic acid
Chronopotentiometric study of the dissociation rate constants of some nitrilotriacetic acid complexes 285

Nitrite analysis
Chromatographic separation of nitrite and nitrate ions 199

Nitrosation
Reactions of coordinated bivalent tetradentate Schiff-base chelates of nickel (II) and palladium (II) 363

NMR spectra
Chemical constituents of *Atlantia racemosa* Wt. and Arn. Structure and synthesis of racemosin, a novel pyranocoumarin 173
Reactions of tetrahalogeno-*o*-benzoquinones—Part VII. Reaction of alkyl-2-naphthols with tetrachloro-*o*-benzoquinone 181

NOE
Chemical constituents of *Atlantia racemosa* Wt. and Arn. Structure and synthesis of racemosin, a novel pyranocoumarin 173

Non-aqueous solvents
Studies on alkoxy complexes of alkyltin (IV) in non-aqueous solvents 61

Normal coordinate analysis
Force field for planar vibrations of urea: Use of CNDO/Force MO calculations 337

Normal coordinate analysis
Vibrational analysis of the isotopic methylammonium ions 429

One pot reaction
Studies in terpenoids. Part 43 235

Optimum geometry
Force field for planar vibrations of urea: Use of CNDO/Force MO calculations 337

Orbital contraction
Some effects of $(2s-2p)$ electron promotion in boron 141

Oscillation reproducibility
The iodate-hydrogen peroxide system: An oscillatory chemical reaction 253

Oscillatory reaction
The iodate-hydrogen peroxide system: An Oscillatory chemical reaction 253

Oxidation
Kinetics of uncatalysed and catalysed oxidation reactions of α-hydroxy acids by periodate 87
Reactions of tetrahalogeno-*o*-benzoquinones—Part VII. Reaction of alkyl 2-naphthols with tetrachloro-*o*-benzoquinone 181

Oxidation of secondary alcohols
Kinetics and mechanism of oxidation of aromatic secondary alcohols by Tl (III) acetate 219

Oxide spinels
A study of $Co_{3-x}Ni_xO_4$ $(0 \leqslant x \leqslant 1)$ system 115

Palladium
2 hydroxy-1-acetonaphthoneoxime as analytical reagent: Gravimetric determination of nickel and palladium 291

Paper chromatography
Chromatographic separation of nitrite and nitrate ions 199

Paper chromatography
Paper chromatographic separation of Co (II) and Co (III) via their acetylacetonate complexes 461

Parameters-ester unit
The dimensions of the ester unit 13

Penicillin allergy
Chemical approaches of penicillin allergy-III 1
Chemical approaches to penicillin allergy-IV 145

Periodate
Kinetics of uncatalysed and catalysed oxidation reactions of α-hydroxy acids by periodate 87

Periodic reaction
The iodate-hydrogen peroxide system: An oscillatory chemical reaction 253

Perovskite oxides
Electrical and magnetic properties of the system $LaNi_{1-x}Fe_xO_3$ 331

PMR
Structure of moreollin, a pigment isolated from *Garcinia morella* Desser 75

Polarography
Polarographic study of the kinetics of oxidation of allyl alcohol by chloramine-T 215

Preparation, Ln_2MoO_6 oxides
Preparation and structure of some Ln_2MoO_6 oxides 267

Propylene oxidation
Binding state of propylene in relation to partial oxidation reaction 405

Quasi-amorphous
Electrical properties of the Fe_2O_3-V_2O_5 system 259

Radial distribution funetion
Liquids and liquid mixtures—I 347

Rare-earth carbonates
Hydrothermal equilibria in Nd_2O_3-H_2O-CO_2 system 69

Rare-earth chelates
Formation constants of chelates of 7-bromo-8-hydroxy-quinoline-5-sulphonic acid with yttrium acid and some lanthanides 359

Real space
Lattice imaging by high resolution electron microscopy: The role of high resolution electron microscopy in solid state chemistry 295

Receptor
Chemical approaches of penicillin allergy—III 1

Reciprocal space
Lattice imaging by high resolution electron microscopy: The role of high resolution electron microscopy in solid state chemistry 295

Ring formation
Total synthesis of *dl*-9(11)-dehydrotestosterone and *dl*-testosterone 239

RKRV curve
Dissociation energy of CO^+ from the true potential energy curve 211

Rotomerisation of ester group
Steric effects on the ultraviolet absorption of 1, 2-enedioic and related systems 371

Rutaceae
Chemical constituents of *Atalantia racemosa* Wt. and Arn. Structure and synthesis of racemosin, a novel pyranocoumarin 173

Salting-in
Conductance studies on the interaction of urea with ions in formamide 121

Salvia dorisiana
Studies in terpenoids. Part 43 235

Schiff base
Iron(III) complexes of α,β-unsaturated β-ketoamines 455

Seebeck coefficient
Electrical and magnetic properties of the system $LaNi_{1-x}Fe_xO_3$ 331

Sintering
Preparation of manganous zinc ferrites 49
Electrical properties of the Fe_2O_3-V_2O_5 system 259

Solid state chemistry
Lattice imaging by high resolution electron microscopy: The role of high resolution electron microscopy in solid state chemistry 295

Solvent effect
Steric effects on the ultraviolet absorption of 1, 2-enedioic and related systems 371

Solvent extraction
Mixed chelates by solvent extraction—Mixed chelates of indium with β-diketones in carbon tetrachloride and xylene media 203

Solvent extraction
Solvent extraction of hafnium 465

Sorbent concentration
Sorption properties of oxides II—Sorption of certain corrosion product cations on hydrous zirconium oxide, thorium oxide and magnetite 415

Sorption
Sorption properties of oxides I—Hydrous thorium oxide 409
Sorpotion properties of oxides II—Sorption of certain corrosion product cations on hydrous zirconium oxide, thorium oxide and magnetite 415

Spin state equilibrium
Electrical and magnetic properties of the $LaNi_{1-x}Fe_xO_3$ 331

Spin transfer
ESR study of mixed ligand complexes of copper with dialkyldiselenophosphate as one of the ligands 395

Standard values-ester unit
The dimensions of the ester unit 13

Steroids
Total synthesis of *dl*-9(11)-dehydrotestosterone and *dl*-testosterone 239

Steric effects
Steric effects on the ultraviolet absorption of 1,2-enedioic and related systems 371

Stoichiometry
Electrical properties of the Fe_2O_3-V_2O_5 system 259

Strontium on copper
Tracer studies of adsorption of Sr^{++} on copper 55

Structure
A study of $Co_{3-x}Ni_xO_4$ ($0 \leqslant x \leqslant 1$) system 115

Structure breaking
Conductance studies on the interaction of urea with ions in formamide 121

Structure determination
Chemical constituents of *Atlantia racemosa* Wt. and Arn. Structure and synthesis of racemosin, a novel pyranocoumarin 173

Structure elucidation
Structure of moreollin, a pigment isolated from *Garcinia morella* Desser 75

Structure, Ln_2MoO_6 oxides
Preparation and structure of some Ln_2MoO_6 oxides 267

Structure making
Conductance studies on the interaction of urea with ions in formamide 121

Sulphate glasses
Spectra of doped transition metal ions in K_2SO_4-$ZnSO_4$ glasses 275

Symmetry
Vibrational analysis of the isotopic methylammonium ions 429

Synthesis
Chemical constitutents of *Atalantia racemosa* Wt. and Arn. Structure and synthesis of racemosin, a novel pyranocoumarin 173
Total synthesis of *dl*-9(11)-dehydrotestosterone and *dl*-testosterone 239

Synergism
Solvent extraction of hafnium 465

Tetra-alkyl ammonium halide
Conductance studies on the interaction of urea with ions in formamide 121

Tetramethylammonium nitrate
Kinetics and mechanism of thermal decomposition of tetramethylammonium nitrate 31

Thermal decomposition
Kinetics and mechanism of thermal decomposition of tetramethylammonium nitrate 31

Thermal transformation
A convenient synthesis of lonchocarpin and isolonchocarpin 247

Thermodynamic parameter
Chemical approaches to penicillin allergy—V 165

Thermodynamics
Thermodynamic study of binary mixtures of isomeric butylamines with *n*-hexane: Enthalpy of hydrogen bonding 23

Thermo-osmosis
Thermo-osmosis of water through composite clay membranes—the parallel arrangement 435

Time dependent
Steric effects on the ultraviolet absorption of 1,2-enedioic and related systems 371

Tracer technique
Tracer studies of adsoprtion of Sr^{++} on copper 55

Transition metal ion spectra
Spectra of doped transition metal ions in K_2SO_4-$ZnSO_4$ glasses 275

Ultraviolet spectra
Steric effects on the ultraviolet absorption of 1,2-enedioic and related systems 371

Vibrational frequencies
Vibrational analysis of the isotopic methylammonium ions 429

Zinc ion coordination
Spectra of doped transition metal ions in K_2SO_4 $ZnSO_4$ glasses 275

Section A

Vol. 87, January–December 1978

SUBJECT INDEX (Earth and Planetary Sciences)

Absorption
Solar x-ray control of the ionospheric absorption measured by the sweep frequency method 231

Acceleration potential
Incursion of the Pacific Ocean Water into the Indian Ocean 29

Analytical model
Cavity radius estimation for contained peaceful nuclear explosions—an analytic approach 13

Apparent velocity
Measurement of apparent velocity and azimuth of seismic signals recorded at an array 263

Azimuth
Measurement of apparent velocity and azimuth of seismic signals recorded at an array 263

Barotropic-baroclinic instability
Some studies of the growth of monsoon disturbances 61

Basalts
Nature of magnetic grains in basalts and implications for palaeomagnetism 235

Basin changes
Input by Indian rivers into the world oceans 77

Boron
Boron in the carbonate rocks of the Kajrahat formation, Mirzapur district, Uttar Pradesh 95

Chemical load
Input by Indian rivers into the world oceans 77

Cloud seeding
A numerical technique for simulation of cloud seeding experiments 179

Contained explosions
Cavity radius estimation for contained peaceful nuclear explosions—An analytic approach 13

Control
Solar x-ray control of the ionospheric absorption measured by the sweep frequency method 231

Coriolis parameter
Some studies of the growth of monsoon disturbances 61

Depth distribution
Incursion of the Pacific Ocean Water into the Indian Ocean 29

Diamagnetic drift
Nonlinear Rayleigh-Taylor instability in partially ionized plasma and the equatorial spread-*F* 1

Differential thermal analysis
Differential thermal analysis and thermogravimetric studies of the Kaladgi (precambrian) argillites, Karnataka 101

Diurnal variation
Daily variations of *E* and *F* region drifts over Tiruchirapalli 215

Dolomites
Boron in the carbonate rocks of the Kajrahat formation, Mirzapur district, Uttar Pradesh 95

D-region ionization
Ionization effects from cosmic sources of x-rays in the lower atmosphere 155

Eddy kinetic energy
Some studies of the growth of monsoon disturbances 61

Effective loss rates
Integrated production and effective loss rates in the ionosphere 147

Environment
The ambient environment of the Gangetic sediments of chalcolithic period 23

Erosion rate
Input by Indian rivers into the world oceans 77

Equatorial electrojet
On the variability of the position of the equatorial electrojet axis in India 133

Equatorial *F* region anomaly
Total electron content at low latitudes 47

Equatorial F-region
On the equatorial spread *F* 115

Equatorial *H* field
Theory for preliminary negative impulse in storm sudden commencement in *H* at equatorial stations 572

Equatorial scintillation
Frequency dependence of equatorial ionospheric scintillations 173

Equatorial spread *F*
Geomagnetic disturbance effects on equatorial spread *F* 109

FLR corrections
Nonlinear Rayleigh-Taylor instability in partially ionized plasma and the equatorial spread-*F* 1

Frequency distribution
A numerical technique for simulation of cloud seeding experiments 179

Focal latitude
On the variability of the position of the equatorial electroject axis in India 133

F-region irregularities
On the equatorial spread-*F* 115

Frequency law of scintillation
Frequency dependence of equatorial ionospheric scintillations 173

Fuchsites
Mineralogy of the fuchsites from Gattihosahalli, Karnataka State 255

Gangetic sediments
The ambient environment of the Gangetic sediments of chalcolithic period 23

Geomagnetic disturbance
Geomagnetic disturbance effects on equatorial spread *F* 109

Hysteresis
In situ magnetic measurements on igneous rock bodies 245

Igneous rock bodies
In situ magnetic measurements on igneous rock bodies 245

Indian rivers
Input by Indian rivers into the world oceans 77

Integrated production rates
Integrated production and effective loss rates in the ionosphere 147

Interplanetary magnetic field
Theory for preliminary negative impulse in storm sudden commencement in *H* at equatorial stations 57

Interplanetary magnetic field
The signature of the interplanetary magnetic field components on the low latitude geomagnetic field disturbance 139

Ionosphere
Frequency dependence of equatorial ionospheric scintillations 173

Daily variations of *E* and *F* region drifts over Tiruchirapalli 215

Ionospheric electron content
Total electron content at low latitudes 47

Ionospheric TEC
Integrated production and effective loss rates in the ionosphere 147

Iron-ore
A preliminary magnetic survey on the iron-ore formation of Addatigala, Andhra Pradesh 89

Irregularities
Nonlinear Rayleigh-Taylor instability in partially ionized plasma and the equatorial spread-*F* 1

Isolated ionospheric irregularities
Diffraction of ATS-6 signals by isolated ionospheric irregularities—some new aspects 165

Kaladgi argillites
Differential thermal analysis and thermogravimetric studies of the Kaladgi (precambrian) argillites, Karnataka 101

Limestone
Boron in the carbonate rocks of the Kajrahat formation, Mirzapur district, Uttar Pradesh 95

Low latitude
The signature of the interplanetary magnetic field components on the low latitude geomagnetic field disturbance 139

Magnetic anomaly
A preliminary magnetic survey on the iron-ore formation of Addatigala, Andhra Pradesh 89

Magnetite
A preliminary magnetic survey on the iron-ore formation of Addatigala, Andhra Pradesh 89

Magnetic disturbance
The signature of the interplanetary magnetic field components on the low latitude geomagnetic field disturbance 139

Magnetic grains
In situ magnetic measurements on igneous rock bodies 245

Mass transfer
Input by Indian rivers into the world oceans 77

MEM
Periodicity in rainfall at Madras 193

Monsoon disturbances
Some studies of the growth of monsoon disturbances 61

Multidomain
Nature of magnetic grains in basalts and implications for palaeomagnetism 235

Nighttime ionosphere
Integrated production and effective loss rates in the ionosphere 147

Nuclear explosions
Cavity radius estimation for contained peaceful nuclear explosions—An analytic approach 13

Nuclear cavity
Cavity radius estimation for contained peaceful nuclear explosions—An analytic approach 13

Ocean expedition
Incursion of the Pacific Ocean Water into the Indian Ocean 29

OCP cultures
The ambient environment of the Gangetic sediments of chalcolithic period 23

Oxyty
Incursion of the Pacific Ocean Water into the Indian Ocean 29

Palaeomagnetism
Nature of magnetic grains in basalts and implications for palaeomagnetism 235

Periodicity
Periodicity in rainfall at Madras 193

Perturbation potential
Some studies of the growth of monsoon disturbances 61

Perturbation steam function
Some studies of the growth of monsoon disturbances 61

Petrography
Mineralogy of the fuchsites from Gattihosahalli, Karnataka State 255

Phase coherence
Nonlinear Rayleigh-Taylor instability in partially ionized plasma and the equatorial spread-*F* 1

Quartzite
Mineralogy of the fuchsites from Gattihosahalli, Karnataka State 255

Rainfall
A numerical technique for simulation of cloud seeding experiments 179
Periodicity in rainfall at Madras 193

Rayleigh-Taylor instability
Nonlinear Rayleigh-Taylor instability in partially ionized plasma and the equatorial spread-*F* 1

Regional seismic sources
Relative performance of different triangular networks in locating regional seismic sources 271

Salinity
Boron in the carbonate rocks of the Kajrahat formation, Mirzapur district, Uttar Pradesh 95

Seasonal and day-to-day movement
On the variability of the position of the equatorial electrojet axis in India 133

Sediment load
Input by Indian rivers into the world oceans 177

Seismic signals
Measurement of apparent velocity and azimuth of seismic signals recorded at an array 1

SEM
The ambient environment of the Gangetic sediments of chalcolithic period 23

Simulation technique
A numerical technique for simulation of cloud seeding experiments 179

Single-domain
Nature of magnetic grains in basalts and implications for palaeomagnetism 235

Single irregularity 76
Diffraction of ATS-6 signals by isolated ionospheric irregularities—Some new aspects 165

Solar declination
On the variability of the position of the equatorial electrojet axis in India 133

Spectrum
Periodicity in rainfall at Madras 193

Spread *F*
On the equatorial spread *F* 115

Static stability
Some studies of the growth of monsoon disturbances 61

Superparamagnetic particles
Nature of magnetic grains in basalts and implications for palaeomagnetism 235

Susceptibility
A preliminary magnetic survey on the iron-ore formation of Addatigala, Andhra Pradesh 89

Susceptibility
In situ magnetic measurements on igneous rock bodies 245

Sweep frequency method
Solar x-ray control of the ionospheric absorption measured by the sweep frequency method 231

Thermogravimetric
Differential thermal and thermogravimetric studies of the Kaladgi (precambrian) argillites, Karnataka 101

Total load
Input by Indian rivers into the world oceans 77

Triangular seismic networks
Relative performance of different triangular networks in locating regional seismic sources 271

X-ray nova
Ionization effects from cosmic sources of x-rays in the lower atmosphere 155

X-ray sources
Ionization effects from cosmic sources of x-rays in the lower atmosphere 155

Section A

Vol. 87, January–December 1978

SUBJECT INDEX (Mathematical Sciences)

Accelerated porous plate
Magnetohydrodynamic flow of a rarefied gas near an accelerated porous plate 219

Admissible pairs
Geometry of G/P—II (The work of De Concini and the basic conjectures) 1

Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265

Aeroacoustics
Aerodynamic noise from wave-turbulence interaction 253

Aerodynamic noise
Aerodynamic noise from wave-turbulence interaction 253

Asymptotic behaviour
Preservation of stability and asymptotic behaviour of perturbed integrodifferential equations in a Banach space 189

Asymptotic equivalence
Preservation of stability and asymptotic behaviour of perturbed integrodifferential equations in a Banach space 189

Banach space
Preservation of stability and asymptotic behaviour of perturbed integrodifferential equations in a Banach space 189

Canonical pairs and dual pairs
Geometry of G/P—II (The work of De Concini and the basic conjectures) 1

Chandrasekar's H-equation
On a class of nonlinear integral equations 169

Classical dynamics
Phase space methods and the Hamilton-Jacobi from of dynamics 85

Classical invariant theory
Geometry of G/P—II (The work of De Concini and Procesi and the basic conjectures) 1

Composite expansion
Composite expansion solution of fingero-imbibition in double phase flow through underground porous medium 65

Convective flow
Convective flow and heat transfer of a viscous heat generating fluid in the presence of a moving, infinite, vertical, porous plate 237

Cylinder
Nonsimilar incompressible laminar boundary layers with magnetic field 55

Cylindrical cosmological model
A cylindrically symmetric universe in general relativity 181

De Concini work
Geometry of G/P-II (The work of De Concini and Procesi and the basic conjectures) 1

Demazure's character
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265

Determinantal varieties
Geometry of G/P—II (The work of De Concini and the basic conjectures) 1

Discrete analogues
On some fundamental integrodifferential inequalities and their discrete analogues 201

Displacement component
Magneto-elastic torsional waves in a bar under initial stress 137

Disks
Steady flow and heat transfer in a visco-elastic fluid between two coaxial rotating disks 227

Dominant weights
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265

Exact computation
An integer arithmetic method to compute generalized matrix inverse and solve linear equations exactly 161

Existence theorem
On a class of nonlinear integral equations 169

Fingero imbibition
Composite expansion solution of Fingro-imbibition in double phase flow through underground porous medium 65

Finite difference scheme
Nonsimilar incompressible laminar boundary layers with magnetic field 55

Fluid dynamics
Convective flow and heat transfer of a viscous heat generating fluid in the presence of a moving, infinite, vertical, porous plate 237

Forced convection
Free and forced convection flow in a rotating channel bounded below by a permeable bed 147

Fourier integrals
Wave propagation in piezoelectric medium of hexagonal symmetry 125
Free convection
Free and forced convection flow in a rotating channel bounded below by a permeable bed 147
Fundamental weights
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265
Generalized matrix inverse
An integer arithmetic method to compute generalized matrix inverse and solve linear equations exactly 161
General relativity
A cylindrically symmetric universe in general relativity 181
Half-spaces
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265
Hammerstein equations
On a class of nonlinear integral equations 169
Hamilton-Jacobi theory
Phase space methods and the Hamilton-Jacobi form of dynamics 85
Heat transfer
Nonsimilar incompressible laminar boundary layers with magnetic field 55
Laminar compressible boundary layer flow at a three-dimensional stagnation point with vectored mass transfer 113
Convective flow and heat transfer of a viscous heat generating fluid in the presence of a moving, infinite, vertical, porous plate 237
Highly porous
Steady flow of a viscous liquid in a porous elliptic tube 79
Hodge-Young theory
Geometry of G/P—II (The work of De Concini and Procesi and the basic conjectures) 1
Hydromagnetic motion
Unsteady hydromagnetic motion of a rotating conducting fluid 71
Integrodifferential equations
Preservation of stability and asymptotic behaviour of perturbed integrodifferential equations in a Banach space 189
Integer arithmetic
An integer arithmetic method to compute generalized matrix inverse and solve linear equations exactly 161
Integrodifferential inequalities
On some fundamental integrodifferential inequalities and their discrete analogues 201
Laminar flow
Convective flow and heat transfer of a viscous heat generating fluid in the presence of a moving, infinite, vertical, porous plate 237
Line bundles
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265
Linear equations
An integer arithmetic method to compute generalized matrix inverse and solve linear equations exactly 161
Magnetohydrodynamic flow
Magnetohydrodynamic flow of a rarefied gas near an accelerated porous plate 219
Mathieu function
Steady flow of a viscous liquid in a porous elliptic tube 79
Maximal parabolic subgroups
Geometry of G/P—II (The work of De Concini and the basic conjectures) 1
Minuscule
Geometry of G/P—II (The work of De Concini and the basic conjectures) 1
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265
Monomial theory
Geometry of G/P—II (The work of De Concini and Procesi and the basic conjectures) 1
Motion
Unsteady hydromagnetic motion of a rotating conducting fluid 71
Moving divisors
Geometry of G/P—II (The work of De Concini and the basic conjectures 1
Noddle and saddle points
Laminar compressible boundary layer flow at a three-dimensional stagnation point with vectored mass transfer 113
Nonsimilar
Nonsimilar incompressible laminar boundary layers with magnetic field 55
Nusselt number
Heat transfer for laminar flow through parallel porous disks of different permeability 209
Ordinary pairs
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265
Parametric differentiation
Laminar compressible boundary layer flow at a three-dimensional stagnation point with vectored mass transfer 113
Permeability
Steady flow of a viscous liquid in a porous elliptic tube 79

Permeability
Heat transfer for laminar flow through parallel porous disks of different permeability 209
Permeable bed
Free and forced convection flow in a rotating channel bounded below by a permeable bed 147
Perturbation technique
Steady flow and heat transfer in a visco-elastic fluid between two coaxial rotating disks 227
Phase-space method
Phase-space methods and the Hamilton-Jacobi form of dynamics 85
Piezoelectric medium
Wave propagation in piezoelectric medium of hexagonal symmetry 125
Point force
Point force in a stratified fluid in a cylinder under a magnetic field 247
Porous
Steady flow of a viscous liquid in a porous elliptic tube 79
Heat transfer for laminar flow through parallel porous disks of different permeability 209
Porous media
Composite expansion solution of Fingero-imbibition in double phase flow through underground porous medium 65
Procesi work
Geometry of G/P-II (The work of De Concini and Procesi and the basic conjectures) 1
Radiation condition
Point force in a stratified fluid in a cylinder under a magnetic field 247
Rarefied gas
Magnetohydrodynamic flow of a rarefied gas near an accelerated porous plate 219
Rotating channel
Free and forced convection flow in a rotating channel bounded below by a permeable bed 147
Rotating flow
Unsteady hydromagnetic motion of a rotating conducting fluid 71
Skew symmetric
Geometry of G/P-II (The work of De Concini and Procesi and the basic conjectures) 1
Skin friction
Nonsimilar incompressible laminar boundary layers with magnetic field 55
Laminar compressible boundary layer flow at a three-dimensional stagnation point with vectored mass transfer 113
Smith diagonal form
An integer arithmetic method to compute generalized matrix inverse and solve linear equations exactly 161
Sphere
Nonsimilar incompressible laminar boundary layers with magnetic field 55
Stability
Preservation of stability and asymptotic behaviour of perturbed integrodifferential equations in a Banach space 189
Standard monomials
Geometry of G/P—II (The work of De Concini and the basic conjectures) 1
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265
Strain components
Magneto-elastic torsional waves in a bar under initial stress 137
Stratified flow
Unsteady hydromagnetic motion of a rotating conducting fluid 71
Stress components
Magneto-elastic torsional waves in a bar under initial stress 137
Stratified fluid
Point force in a stratified fluid in a cylinder under a magnetic field 247
Summary difference equations
On some fundamental integrodifferential inequalities and their discrete analogues 201
Subgroup
Large and high subgroup 177
Subsonic disturbance
Subsonic and supersonic disturbances in the generation of surface waves in a liquid layer adjacent to a high-speed gas-stream 107
Supersonic disturbance
Subsonic and supersonic disturbances in the generation of surface waves in a liquid layer adjacent to a high-speed gas-stream 107
Surface waves
Subsonic and supersonic disturbances in the generation of surface waves in a liquid layer adjacent to a high-speed gas-stream 107
Unsteady motion
Unsteady hydromagnetic motion of a rotating conducting fluid 71
Vanishing theorems
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 265
Variabie fluid properties
Laminar compressible boundary layer flow at a 3-dimensional stagnation point with vectored mass transfer 113

Vectored mass transfer
Laminar compressible boundary layer flow at a three-dimensional stagnation point with vectored mass transfer 113
Viscous dissipation
Nonsimilar incompressible laminar boundary layers with magnetic field 55
Visco-elastic
Steady flow and heat transfer in a visco-elastic fluid between two coaxial rotating disks 227
Viscous flow
Convective flow and heat transfer of a viscous heat generating fluid in the presence of a moving, infinite, vertical, porous plate 237
Wave propagation
Wave propagation in piezoelectric medium of hexagonal symmetry 125
Wave surface
Wave propagation in piezoelectric medium of hexagonal symmetry 125
Wave-turbulence interaction
Aerodynamic noise from wave-turbulence interaction 253
Young diagrams
Geometry of G/P—II (The work of De Concini and the basic conjectures) 1
